ABOUT US

Our goal is to provide you with great service to match your protective coatings needs at a competitive price. With many years of experience with many types of coatings, we will help you find the very best coating for any application. From one day garage floors to commercial buildings and manufacturing facilities, we have a coating for you that will protect, beautify, and last! Make that old cracked and pitted floor look like new with the best in coating technology for a low maintenance, anti-skid, beautiful surface.

SERVICE AREAS

We are proud to call Minnesota our home and serve all of the Twin Cities, its suburbs and many other surrounding areas.

CUSTOMER SATISFACTION

We are passionate about what we do and dedicated to complete customer satisfaction. Our experienced installers work hard every day to achieve and exceed this goal. We never stop pushing to surpass the standards of both our customers and our company.

QUALITY AND SERVICE

We proudly use Penntek Industrial Coatings systems for all your flooring needs. We are strong believers in their superior technology and advanced chemistry. We are fully licensed and insured installers that make quality and reliability our highest priorities to ensure that you will be very pleased with your new floor!

APPLICATIONS

OUR CHIP SYSTEM IS A BEAUTIFUL AND DURABLE SOLUTION – GREAT FOR A WIDE VARIETY OF APPLICATIONS.

The Chip System provides a granite look with an orange peel texture, which makes it a great floor for many applications. Its durability and chemical resistance are important, especially for high traffic areas and even commercial applications.

PREPARATION

Our main forms of preparation are shot blasting and diamond grinding which extend the life of your floor by giving it the greatest adhesion possible. To do this we use Blastpro shot blasting equipment and/or Lavina diamond grinders. Since each floor is unique, we use a variety of equipment to ensure extreme porosity for a successful application every time!

CONCRETE RECONSTRUCTION

Being from Minnesota, we know our harsh winters can take a toll on concrete. We use Penntek Industrial Coatings menders and fillers in order to fix any pits, cracks, and/or spalls that are present in your existing concrete floor before we begin the coating process.

GARAGE FLOOR PROCESS

In garage floor applications, we recommend a polyurea full chip system which includes a polyurea basecoat, chip, and polyaspartic topcoat.

BASECOAT

We start by mixing a small amount of basecoat which is a 100% solids, self-priming pure polyurea product. We use this to cut into all of the edges around the floor. We then mix up larger amounts to coat the entire floor.

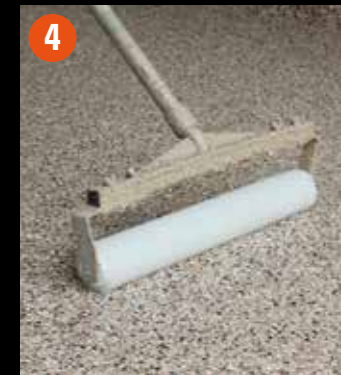

BROADCASTING THE CHIP

Once the floor is coated, we broadcast chip into the wet coating by hand, ensuring that the whole floor is entirely covered.

SCRAPING THE CHIP

Once the basecoat is fully cured, we scrape the floor with metal blades to remove any loose or vertically standing flakes. We then use a vacuum to recover any loose chip left behind on the floor.

CLEAR COAT

The final step is to roll out the UV stable polyaspartic clear coat. After four to six hours you can walk on your new coating and after 24 hours you can park and drive on it.

BENEFITS

BETTER THAN AN EPOXY GARAGE FLOOR

There are many advantages of our superior products over the commonly available epoxy floor coverings:

- > **4x Stronger**
- > **Installed in One Day**
- > **UV Stable**
- > **Will Not Crack or Peel**
- > **Resists Salt, Oil, and Gas**
- > **Non-slip, Safe Tread**

SINGLE DAY INSTALL

One of the biggest advantages of the Full Chip System is that it is installed in a single day. Under most conditions, it will be fully cured and ready for vehicle traffic in just 24 hours!

CARE

Our full chip floors are extremely skid resistant but also easy to clean and keep clean. The array of chip colors offer the ability to hide dirt and mud while the monolithic, nonporous surface means that dirt, oil, gas and other contaminants cannot penetrate the surface. This results in a floor that is easy to clean- just sweep and wash away the dirt.

COMMERCIAL

From warehouses to manufacturing facilities and kitchens to hospitals we have the right coating to fit your need. Our wide range of coatings and preparation equipment will ensure minimal down time and a successful coatings application every time. We will work with you from beginning to end to make sure you end up with the perfect coating to match the demands of your flooring needs.
